A heavy-duty 10 HP Star Delta Starter Panel, refurbished and tested — ideal for smooth starting of three-phase induction motors in industrial plants, construction sites, and pump stations. Sourced directly from decommissioned vessels at Alang Ship Breaking Yard, Asia's largest ship breaking yard. Standard Machinery offers this ex-ship panel at a fraction of new market price, backed by quality checks and fast dispatch.

- ✓ Heavy-duty 10 HP (7.5 kW) Star Delta Starter Panel for 3-phase induction motors — reduces startup inrush current effectively
- ✓ Refurbished ex-ship condition — sourced from decommissioned vessels at Alang Ship Breaking Yard, Gujarat
- ✓ Includes star contactor, delta contactor, main contactor, overload relay, and timer relay — complete panel assembly
- ✓ Suitable for 415V, 3-phase, 50 Hz systems — compatible with standard Indian and international industrial power supply
- ✓ Physically inspected and functionally tested before dispatch — no untested stock sold
- ✓ Priced 40-60% below equivalent new panels — ideal for contractors, plant owners, and industrial buyers on budget
- ✓ Export available — suitable for buyers in Africa, Middle East, and Southeast Asia with standard 415V infrastructure

Technical Specifications

Manufacturer

Standard Machinery

SKU	SM-SDSTART-001
Condition	Refurbished (Ex-Ship)
Voltage	415 V
Phase	3-Phase
Frequency	50 Hz
Motor Rating	10 Hp
Motor Rating (kW)	7.5 KW
Control Voltage	230 / 415 (as available) V
Dispatch Time	2 to 5 Business Days

Product Description

A Star Delta Starter is the most trusted method for reducing inrush current during the startup of three-phase induction motors. This refurbished 10 HP Star Delta Starter Panel has been carefully restored from ex-ship electrical systems and is designed to handle the demanding startup requirements of industrial motors rated at 10 HP (7.5 kW). The panel houses a star delta contactor set, overload relay, timer relay, and control circuitry — all inspected, cleaned, and tested before dispatch. Suitable for 415V, 3-phase, 50 Hz power systems standard across India and many export markets.

Star delta starters are used across a wide range of industrial applications where large motors require a controlled, current-limited startup sequence. This panel is suitable for driving submersible pumps, centrifugal water pumps, air compressors, industrial blowers, conveyor motors, and heavy machinery in manufacturing plants, construction sites, water treatment facilities, and agricultural pump stations. It is equally suitable for marine and offshore use, as well as industrial facilities in Africa, the Middle East, and Southeast Asia where 415V three-phase systems are standard.

Standard Machinery is a refurbished industrial machinery supplier based in Bhavnagar, Gujarat, India — located minutes from Alang Ship Breaking Yard, Asia's largest ship breaking yard. Alang handles over 50% of Asia's ship recycling, and every decommissioned vessel carries industrial-grade electrical panels, motors, and switchgear built to marine and international standards. Sourcing directly from Alang allows Standard Machinery to offer ex-ship machinery at 40–60% less than the price of equivalent new equipment — without compromising on quality or reliability. Every panel is physically inspected and functionally tested before it leaves our facility.

To purchase this 10 HP Star Delta Starter Panel, visit standardmachinery.store or call +91 88666 69293 / +91 98983 98786. Standard Machinery dispatches within 2 to 5 business days across India. Export orders are accepted for international buyers in the Middle East, Africa, and Southeast Asia — contact us directly for export pricing, documentation, and shipping arrangements. Custom starter panels are also available on order for specific motor ratings, enclosure types, or control requirements.

Compatibility

Compatible with industries including manufacturing plants, water treatment, construction, agriculture, and marine/offshore facilities. Designed for use with 3-phase squirrel cage induction motors rated at 10 HP (7.5 kW) — suitable for pumps, blowers, compressors, and conveyors.

Compatible with 415V, 3-phase, 50 Hz electrical systems standard in India, Middle East, Africa, and Southeast Asia.

Suitable for export to international markets — complies with general industrial electrical standards; buyers advised to verify local enclosure/certification requirements
