A heavy-duty 20 HP Star Delta Starter Panel fitted with genuine Schneider Electric contactors — refurbished from ex-ship electrical systems and fully tested for reliable industrial use. Sourced directly from decommissioned vessels at Alang Ship Breaking Yard, Asia's largest ship breaking yard. Standard Machinery offers this premium ex-ship panel at highly competitive prices, with fast dispatch across India and export availability worldwide.

- ✓ Heavy-duty 20 HP (15 kW) Star Delta Starter Panel — fitted with genuine Schneider Electric contactors for proven industrial reliability
- ✓ Refurbished ex-ship condition — sourced directly from decommissioned vessels at Alang Ship Breaking Yard, Gujarat, India
- ✓ Complete panel assembly — includes Schneider main contactor, star contactor, delta contactor, overload relay, and adjustable timer relay
- ✓ Rated for 415V, 3-phase, 50 Hz systems — compatible with standard Indian and international industrial power supply infrastructure
- ✓ Physically inspected and functionally tested before every dispatch — no untested or unverified stock sold
- ✓ Priced 40-60% below equivalent new Schneider panels — outstanding value for contractors, plant owners, and industrial buyers
- ✓ Export available to Middle East, Africa, and Southeast Asia — Schneider components ensure easy local spare parts availability abroad

## Technical Specifications

Manufacturer

Standard Machinery

<b>SKU</b>	SM-SDSTART-002
<b>Condition</b>	Refurbished (Ex-Ship)
<b>Voltage</b>	415 V
<b>Phase</b>	3-Phase
<b>Frequency</b>	50 Hz
<b>Motor Rating</b>	20 HP
<b>Motor Rating (kW)</b>	15 Kw
<b>Control Voltage</b>	230 / 415 (as available) V
<b>Contactor Brand</b>	Schneider Electric
<b>Dispatch Time</b>	2 to 5 Business Days

## Product Description

---

This refurbished 20 HP Star Delta Starter Panel is built around genuine Schneider Electric contactors — one of the most trusted names in industrial electrical control worldwide. Designed for smooth, current-limited startup of three-phase induction motors rated at 20 HP (15 kW), the panel includes a Schneider main contactor, star contactor, delta contactor, overload relay, and timer relay — all housed in a sturdy MS sheet enclosure. The panel has been carefully stripped from decommissioned ship electrical systems, fully inspected, cleaned, and functionally tested to ensure dependable performance. Compatible with 415V, 3-phase, 50 Hz power systems standard across India and most international industrial markets.

The 20 HP Star Delta Starter with Schneider contactor is a high-demand panel for a wide range of industrial motor applications. It is widely used to start large submersible pumps, centrifugal pumps, industrial air compressors, heavy-duty blowers, conveyor belt motors, and crushing machinery in manufacturing plants, water treatment facilities, construction sites, and agricultural pump stations. Its Schneider contactor build quality makes it particularly valued in applications requiring frequent motor switching cycles and long operational life. Export buyers in Africa, the Middle East, and Southeast Asia favour Schneider-equipped panels for their proven reliability and easy spare parts availability.

Standard Machinery is a refurbished industrial machinery and electrical panel supplier based in Bhavnagar, Gujarat, India — located minutes from Alang Ship Breaking Yard, Asia's largest ship breaking yard. Alang handles over 50% of Asia's ship recycling, and every decommissioned vessel carries marine-grade electrical systems built to rigorous international standards. Sourcing directly from Alang enables Standard Machinery to supply Schneider-fitted panels at 40–60% below the cost of equivalent new panels — without any compromise on component quality or performance. Every panel undergoes a physical and functional inspection before leaving our facility, ensuring buyers receive a reliable, ready-to-install product.

To order this 20 HP Schneider Star Delta Starter Panel, visit [standardmachinery.store](https://standardmachinery.store) or contact us at +91 88666 69293 / +91 98983 98786. Standard Machinery dispatches within 2 to 5 business days across India. International buyers in the Middle East, Africa, and Southeast Asia can place export orders directly — we handle export documentation and shipping coordination. Custom-built star delta panels for other motor ratings, Schneider or alternative contactor brands, and specific enclosure types are also available on request.

## Compatibility

---

Compatible with industries including manufacturing, water treatment, construction, agriculture, mining, and marine/offshore facilities requiring 20 HP motor control

Designed for 3-phase squirrel cage induction motors rated at 20 HP (15 kW) — suitable for pumps, compressors, blowers, conveyors, and heavy industrial machinery

Compatible with 415V, 3-phase, 50 Hz electrical systems standard in India, UAE, Saudi Arabia, Kenya, Nigeria, Malaysia, and other export markets

Schneider Electric contactor components ensure compatibility with global spare parts supply chains — ideal for export buyers needing long-term maintainability
