A heavy-duty refurbished Gorman-Rupp J Series Submersible Sewage Pump, model JSV3D60-E4 — 4 HP, 3-phase, 230/460V, made in Canada — sourced from decommissioned vessels at Alang Ship Breaking Yard, Asia's largest ship breaking yard. Built to handle raw sewage, wastewater, and solids-laden fluids in demanding industrial and marine environments. Standard Machinery offers this genuine Gorman-Rupp ex-ship pump at a highly competitive price with fast dispatch across India and export availability worldwide.

In Stock

- ✓ Genuine Gorman-Rupp J Series submersible sewage pump — model JSV3D60-E4, manufactured in Canada to international marine and industrial standards
- ✓ Rated 4 HP at 1,683 RPM — engineered for continuous duty in raw sewage, wastewater, and solids-laden fluid applications
- ✓ Dual-voltage capability — 230V / 460V, 3-phase, 60 Hz — versatile deployment across varied electrical infrastructures in India and export markets
- ✓ Full load current 12.4A (230V) / 6.2A (460V) — efficient power draw for its pumping capacity
- ✓ Refurbished ex-ship condition — sourced from decommissioned vessels at Alang Ship Breaking Yard and inspected and tested before dispatch
- ✓ Priced 40-60% below equivalent new Gorman-Rupp units — genuine branded pump at a highly competitive ex-ship price
- ✓ Export available to Middle East, Africa, and Southeast Asia — global OEM spare parts availability for Gorman-Rupp J Series

Product Description

The Gorman-Rupp JSV3D60-E4 is a heavy-duty submersible sewage pump from the internationally acclaimed J Series range — manufactured in Canada to rigorous marine and industrial standards. This refurbished unit is rated at 4 HP, operates on a 3-phase, 230/460V dual-voltage supply at 60 Hz, draws 12.4/6.2 amps, and runs at 1,683 RPM. Gorman-Rupp is one of North America's most respected pump manufacturers, and J Series submersible pumps are engineered specifically for continuous duty in raw sewage, wastewater, and solids-laden fluid applications. This ex-ship unit has been carefully recovered from a decommissioned vessel, thoroughly inspected, cleaned, and tested before listing — ensuring it is ready for immediate installation and reliable service.

The Gorman-Rupp JSV3D60-E4 submersible sewage pump is suited to a wide range of demanding pumping applications. It is used in municipal sewage treatment plants, industrial wastewater systems, construction site dewatering, marine and offshore blackwater systems, food processing effluent handling, chemical plant drainage, and large-scale building sump systems. Its dual-voltage capability — 230V and 460V, 3-phase — makes it exceptionally versatile for deployment across different electrical infrastructures in India and international markets. Export buyers across the Middle East, Africa, and Southeast Asia specifically seek out Gorman-Rupp pumps for their proven durability and the global availability of OEM spare parts.

Standard Machinery is a refurbished industrial machinery supplier based in Bhavnagar, Gujarat, India — located minutes from Alang Ship Breaking Yard, Asia's largest ship breaking yard. Alang handles over 50% of Asia's ship recycling, and decommissioned vessels regularly carry premium international-brand equipment including Gorman-Rupp pumps, which were installed for critical marine sewage and bilge duties. Sourcing directly from Alang allows Standard Machinery to offer genuine Gorman-Rupp pumps at 40–60% below the price of new equivalent units — with the confidence of a known brand, a known model number, and a physically verified condition. Every pump is inspected and tested before dispatch.

To purchase this Gorman-Rupp JSV3D60-E4 Submersible Sewage Pump, visit standardmachinery.store or contact us at +91 88666 69293 / +91 98983 98786. Standard Machinery dispatches within 2 to 5 business days across India. Export orders are accepted from buyers in the Middle East, Africa, Southeast Asia, and beyond — we assist with export documentation and international shipping coordination. If you require multiple units, alternative HP ratings, or other Gorman-Rupp models, contact us directly as stock availability varies.

Compatibility

Compatible with municipal sewage treatment plants, industrial wastewater facilities, construction dewatering, marine blackwater systems, building sumps, and chemical plant drainage

Suitable for pumping raw sewage, wastewater, effluent, and solids-laden fluids — designed for continuous submersible duty in demanding environments

Compatible with 230V and 460V, 3-phase, 60 Hz electrical systems — note: standard Indian supply is 50 Hz; buyers should confirm Hz compatibility or use with a suitable VFD/frequency converter for 50 Hz applications

Gorman-Rupp J Series OEM spare parts available globally — compatible with standard Gorman-Rupp J Series service kits, seals, impellers, and wear components
