A heavy-duty refurbished SEW Eurodrive geared motor with integrated electromagnetic brake and winch drum — rated 5 HP, 3-phase, 380–440V, manufactured in Germany. SEW Eurodrive is the global benchmark for industrial gear motors, and this complete winch unit delivers the controlled low-speed torque and fail-safe braking that serious lifting and pulling applications demand. Professionally refurbished, tested, and ready to install — at a price that makes buying new impossible to justify.

- ✓ Genuine SEW Eurodrive 5 HP geared motor — German-made, the global benchmark for industrial drive technology, built for precision and long service life
- ✓ Complete winch assembly — geared motor, integrated electromagnetic brake, and winch drum in one ready-to-install unit
- ✓ Electromagnetic brake — engages instantly on power cut for fail-safe load holding, essential for overhead lifting, deck winch, and mooring applications
- ✓ 3-phase, 380–440V range — covers standard industrial voltage across most global markets, maximum deployment flexibility
- ✓ High torque, low speed geared output — engineered specifically for controlled winch, hoist, and pulling applications where speed precision and load control matter
- ✓ Professionally refurbished and operationally tested — mechanically inspected, electrically tested, and run-verified before every dispatch
- ✓ Global SEW Eurodrive OEM spare parts and service network — authorised service centres and parts availability worldwide for full long-term maintainability

Technical Specifications

Manufacturer	SEW
SKU	SM-SEWWNCH-001
Brand	SEW Eurodrive
Country of Manufacture	Germany
Condition	Refurbished
Product Type	Winch Geared Motor with Brake
Assembly	Geared Motor + Brake + Drum
Power (kW)	3.7 KW
Power	5 HP
Voltage	380 ~ 440 V
Phase	3-Phase
Brake Type	Electromagnetic (Fail-Safe)
Dispatch Time	2 to 5 Business Days

Product Description

SEW Eurodrive is not just a gear motor brand — it is the engineering standard that the rest of the industry measures itself against. Founded in Germany and manufacturing to the most exacting tolerances in the drive technology sector, SEW Eurodrive geared motors are specified by engineers worldwide wherever precision, reliability, and long service life are non-negotiable. This refurbished unit is a complete winch assembly — a 5 HP SEW Eurodrive geared motor paired with an integrated electromagnetic brake and a winch drum — delivering exactly the controlled, low-speed high-torque output that winch, hoist, and lifting applications demand. The electromagnetic brake engages instantly on power cut, providing fail-safe load holding that is critical in overhead lifting, deck winch, mooring, and material handling operations. Rated for 3-phase operation across a 380-440V supply range, this unit covers the standard industrial voltage used across most global markets. This is a professionally refurbished assembly — mechanically inspected, electrically tested, and operationally verified before dispatch.

Complete winch drive assemblies of this specification — geared motor, brake, and drum in one unit — are used across an enormous range of industrial and marine applications. Deck winches and mooring systems aboard commercial vessels and offshore platforms, overhead crane travel drives, material hoists in construction and manufacturing, cable pulling machines for electrical and telecom contractors, anchor handling equipment, cargo and net winches in fishing vessels, stage and theatrical rigging, and industrial pulling systems in mining and quarrying — all of these rely on exactly this type of complete geared motor-brake-drum assembly. The SEW Eurodrive pedigree means this unit was almost certainly originally installed in a precision or safety-critical application — the build quality reflects that. Export buyers across the Middle East, Africa, and Southeast Asia specifically seek SEW Eurodrive units for the global availability of OEM spare parts and SEW's international service network.

SEW Eurodrive operates one of the most extensive industrial drive service networks in the world — with authorised service centres and spare parts availability across Europe, the Americas, Asia, the Middle East, and Africa. That global serviceability is a decisive advantage for any buyer planning long-term deployment of this unit, whether in a fixed industrial installation or a mobile or marine application. Standard Machinery sources professionally refurbished industrial machinery from real working environments — every unit is physically inspected and run-tested before it ships. We supply factory maintenance teams, crane and hoist contractors, marine equipment dealers, plant engineers, and export

buyers who need genuine brand-name equipment at prices that make serious commercial sense.

To purchase this SEW Eurodrive 5 HP Winch Geared Motor with Brake & Drum, visit standardmachinery.store or contact us at +91 88666 69293 / +91 98983 98786. We dispatch within 2 to 5 business days. Export orders are fully supported with documentation and international shipping coordination — we supply buyers across the Middle East, Africa, Southeast Asia, Europe, and beyond. If you need a specific RPM output, higher HP rating, alternative voltage, or other SEW Eurodrive models, contact us directly — our refurbished gear motor stock is updated regularly.

Compatibility

Compatible with marine deck winches, mooring systems, anchor handling, overhead crane travel drives, material hoists, cable pulling machines, cargo winches, fishing vessel net winches, and industrial pulling systems

Suitable for any application requiring controlled low-speed high-torque output with fail-safe electromagnetic braking — construction, manufacturing, mining, marine, and offshore

Compatible with 380-440V, 3-phase, 50/60 Hz industrial supply — verify exact frequency compatibility on nameplate before installation; suitable for most international industrial markets

SEW Eurodrive gearbox and motor OEM parts — gear units, seals, bearings, brake pads, and encoder accessories — available globally through SEW Eurodrive's authorised service network
