Schneider Electric LC1D95M7 95A 3 pole contactor with 220V AC coil, designed for heavy-duty industrial motor control, automation panels, and high-load electrical systems. Ideal for contractors, OEMs, and large-scale industrial applications.

- ✓ Heavy-duty industrial contactor for high-load applications
- ✓ 95A current rating for large motor control
- ✓ 3 pole configuration for reliable switching
- ✓ 220V AC coil for stable and efficient operation
- ✓ Long mechanical and electrical life
- ✓ Suitable for heavy machinery and industrial systems
- ✓ Compact design for panel integration
- ✓ Easy installation and low maintenance

Technical Specifications

Manufacturer	Schneider Electric
SKU	SM-SCH-LC1D95M7-95A-CTR
Model Number	LC1D95M7

Rated Current	95 Ampere
Coil Voltage	220 Volt
Frequency	50 / 60 Hz
Number of Poles	3 Pole
Type	AC Contactor
Usage	Heavy Duty Motor Control / Industrial Automation

Product Description

The Schneider Electric LC1D95M7 contactor is a high-capacity 95A 3-pole industrial contactor designed for heavy-duty motor control and power switching applications. Built with robust engineering and high-quality components, it ensures reliable performance in demanding industrial environments.

This contactor is widely used in industrial automation systems, electrical control panels, HVAC systems, and large machinery operations. It is ideal for contractors, panel builders, OEM manufacturers, and infrastructure projects that require dependable and efficient switching solutions.

With a 220V AC coil, the LC1D95M7 offers stable operation, easy integration, and long operational life. Its compact yet powerful design makes it suitable for both domestic and international industrial markets.

Compatibility

- Compatible with industrial motor control panels
- Suitable for high-capacity electrical distribution systems
- Works with overload relays and heavy-duty motor starters
- Compatible with PLC automation panels and control circuits
- Suitable for HVAC systems and large compressor units
- Works in manufacturing plants and heavy industrial machinery setups
- Compatible with OEM equipment and custom-built panels
- Suitable for contractors and large-scale electrical installations
- Can be used in infrastructure, construction, and mining projects
